

MAVENCLAD® (cladribine tablets) Dosing Tracker

The tables below can help you track your treatment with MAVENCLAD®. This will be either one or two tablets daily, until your tablets run out. The number of tablets you take in each treatment week will depend on your weight and you may receive more than one carton of medication. Tablets are taken for 4–5 days at the start of the first week and then again for 4–5 days in week 5.

If your daily dose consists of two tablets, be sure to take them both together as a single dose. There should be an interval of 24 hours between your daily doses, so try to take your tablets at approximately the same time each day.

It's important that you take all of your medication exactly as prescribed. If you are not sure about your dose or have any questions, speak to your doctor or call the MAVENCLAD® adveva™ team on 1800 290 895 (9am–5pm AEST).

Please call the MAVENCLAD® adveva™ team on 1800 290 895 if you need any assistance getting your medication through a pharmacy.

Dosing trackers

Remind yourself how many tablets your doctor has prescribed for you each day. Enter the tablets you have taken. Tick the box every day when you have taken your prescribed dose.

Your weight range is: 60 to <70 kg

First treatment week (week 1)

MAVENCLAD® 10mg tablets per week day

Week 1 start date:

	Day 1	Day 2	Day 3	Day 4	Day 5
Date taken	<input type="text" value="DDMMYY"/>				
Number of tablets prescribed per day	<input type="text" value="2"/>	<input type="text" value="1"/>	<input type="text" value="1"/>	<input type="text" value="1"/>	<input type="text" value="1"/>
Tick if you took your dose	<input type="checkbox"/>				

Second treatment week (week 5)

In your second treatment week, you may not have to take exactly the same number of tablets as your first treatment week. Your doctor or pharmacist will explain how many tablets you need to take each day.
